

QuickSat® Hydrogen Peroxide Wipers

Point-of-use wetted wiper for routine cleaning and removal of microbial contamination

Benefits

- Optimal H₂O₂ concentration for cleaning and removing microbial contamination
- Optimal wiper wetness — wet enough to deliver hydrogen peroxide, dry enough to pick up and remove contamination and no free liquid in package
- Easier than diluting concentrated hydrogen peroxide to use with dry wipers
- Point-of-use preparation eliminates exposure to the chemicals
- Safer to use
- Eliminates squirt bottles
- One wiper for applying H₂O₂ and for removing contamination

Description

QuickSat® Hydrogen Peroxide Wipers are pre-wetted with 6% hydrogen peroxide at the point-of-use.

Hydrogen peroxide is commonly used to control microbial growth, but can quickly degrade with time, heat, light or any contamination. Concentrated H₂O₂ requires storage, handling, diluting and proper disposal. QuickSat Hydrogen Peroxide point-of-use wipers overcome these difficulties.

The patent-pending QuickSat delivery system contains three compartments separated by frangible seals.

- Compartment #1 contains 0.5% H₂O₂/DIW
- Compartment #2 contains urea hydrogen peroxide, dry crystals
- Compartment #3 contains 25 Vectra® Honeycomb® 10 (TX1060) wipers

TX1060, Vectra® Honeycomb® 10, wipers are cleanroom knit polyester wipers with a honeycomb texture for very effective scrubbing. They both scrub and remove contamination and are particularly effective in removing microbial growth on wet processing equipment.

The convenient point-of-use packaging makes QuickSat Hydrogen Peroxide Wipers efficient for both routine maintenance and periodic cleaning.

Features

- QuickSat Hydrogen Peroxide delivery system — three compartments maintain the component integrity up to the point-of-use
- Vectra processed Honeycomb 10 (TX1060) wipers are designed for scrubbing and cleaning
- Double-bagged, allowing for inner bag wipe-down before introduction into cleanroom
- Lot traceable
- Tear notch for convenient access to wetted wipers
- One-year shelf life of unopened package

Applications

- Cleaning microelectronic tools in wet processing areas
- Controlling microbial growth in controlled environments
- Convenient for cleaning during preventative maintenance cycles
